Apr 29, 2016

NBR. 695

Following agreement with the RSGB, management of the IOTA Programme has now moved to Islands on the Air (IOTA) Ltd, a new not-for-profit company, limited by guarantee in UK law. This body now has full responsibility for all aspects of the programme, its day to day management, strategy, policy, finance, development, promotion and marketing. The company has been registered in the names of Roger Balister, G3KMA and Stan Lee, G4XXI who are its current directors but a full Board of Directors will be formed shortly. The new IOTA Directory, published by the RSGB this month, refers to the newly set-up company under a different name but this has now been changed in the way always intended. It will take a little time to carry through all aspects of the changed governance but IOTA enthusiasts should be assured that the new company is fully committed to completing the paperless QSLing project that will allow electronic confirmation of contacts. No significant change of policy is otherwise envisaged. More information shortly.

73 Roger

**Roger Balister, G3KMA
IOTA Manager, Director/Trustee
Islands on the Air (IOTA) Ltd**

New IOTA Directory

The Spring 2016 IOTA Directory is now available from the RSGB Shop at http://www.rsgbshop.org/acatalog/Online_Catalogue_IOTA_42.html. It contains the complete, official listing of IOTA islands as well as everything you need to participate in IOTA. Included in the colour section are fascinating reports of several rare and costly IOTA operations from Coetivy Island, an outlier of the Seychelles used as a prison camp, Melville Island in the Canadian Arctic where scientists were the only companions, through to the remote uninhabited Antipodes Island, seldom visited by humans, in the far Sub-Antarctic islands of New Zealand.

Rule Changes

The new Directory introduces some fairly significant rule changes, made in the interests of simplification, which will take effect from 1 June 2016.

a. The discontinuation of the issue of paper certificates. Given ever-increasing postal charges and technological advances IOTA Management has decided that now in the 21st century all certificates should be sent electronically. Exceptionally, if this causes real problems, you can

NBR. 695

ask for certificates to be sent by post but this will attract an extra charge. (Rule C.5.12 and Annex B)

b. The discontinuation of giving credit for VHF / UHF contacts in the Standard Category of Application. Previously this was allowed but it made for awkward complications in the crediting of contacts in the two categories of application affected (Standard and VHF / UHF), and since the incidence of credits gained this way was so small, it was felt that this change would have very little effect on applicants. (Rule C.3.5)

c. Charges have been increased and the charging regime has been simplified in the interests of clarification. The basic starter 100 Islands certificate will in future be charged separately from the registration charge. (Annex B)

d. The threshold figure defining a "rare" IOTA group has been raised to cover those groups which 20% or fewer participants (previously 15%) have credited to their scores. Recent activity from a number of rare IOTAs has reduced the number of groups in this category. (Rule F.3.1)

When the system of Paperless QSLing is fully launched, there will be further changes to the procedures.

Coming Soon

The main IT Project to introduce paperless QSLing is on schedule for introduction early next year but stand by for an announcement shortly about interim steps in that direction.

Also, in the new Directory, read about the newly formed Friends of IOTA and an appeal for your help.

Mount Athos (from OPDX)

Mount Athos has more than one Amateur Radio operator. We all know of SV2ASP/A, Monk Apollo, from the Docheiariou Monastery, however he is not the only one in the rare DXCC.

In late 2015 following the Elmering of SV1RP, George, Monk Iakovos, who lives at the Koutloumousiou Monastery in Mt. Athos took his Amateur Radio exam and passed. He has an IC-735 and runs 100 watts into a vertical on 40 Meters. Monk Iakovos began operations yesterday on 7.141 MHz just prior to 1700Z and was there for about an hour. He can operate on SSB and CW and could be QRV again this weekend. For those fortunate enough

to work the newest Amateur Radio operator from Mount Athos QSLs should be sent via SV1RP. Also it would be advisable to add SV2RSG to your logging database as Mount Athos, not Greece. Monk Iakovos has a [QRZ.com](http://www.qrz.com) page at <https://www.qrz.com/db/sv2rsg>.

RTTY CONTEST DINNER (from OPDX)
